Addendum # 1 – Recycling Building Expansion PER (Additional Attachments)

Date of Addendum: **September 10, 2026**

NOTICE TO ALL BIDDERS AND PLANHOLDERS

The Bid Documents for the above-referenced Project are modified as set forth in this Addendum. The original Bid Documents and any previously issued addenda remain in full force and effect, except as modified by this Addendum, which is hereby made part of the Bid Documents. Vendors will take this Addendum into consideration when preparing and submitting a bid and shall acknowledge receipt of this Addendum in the space provided in the Bid Documents.

BID SUBMITTAL DEADLINE

The bid submittal time has not been changed.

1.0 – ATTACHMENTS

Item	Description
1	Output Year to Date
2	Recycling Output Summary
3	Pre-proposal Meeting Sign-in Sheet

2.0 – CLARIFICATIONS

The following clarifications are provided as a matter of information to clarify issues raised about the Bid Documents.

Item	Description

3.0 – QUESTIONS AND ANSWERS

The following questions and answers are provided as a matter of information to clarify issues raised about the Bid Documents.

Item	Questions and Answers

END OF ADDENDUM

Cardboard (OCC 11)

Total	162	167540			83.77

Recycling Output Data (2024–2026)

4 material categories:

- **OCC 11 (Cardboard)**
- **Mixed Paper**
- **Plastic**
- **Aluminum**

1. Total Output Summary (Most Recent Totals)

Material	Bales	Net Weight	Tonnage
OCC 11	768	1,166,960	583.41 tons
Mixed Paper	258	359,240	179.62 tons
Plastic	312	433,720	215.86 tons
Aluminum	162	167,540	83.77 tons

Total across all materials: 1,062.66 tons

2. Material Category Performance

OCC 11 (Cardboard)

- Largest contributor at **583.41 tons**.
- Weight per bale is extremely consistent: **~20.5 to 22.7 tons per shipment**.
- Production increased steadily month-to-month with no major dips.

Mixed Paper

- Produced **179.62 tons**, about **30%** of OCC output.
- Fewer shipments and bales.
- Extremely stable tonnage per load (**21–23 tons**).

Plastic

- Surprisingly strong contributor at **215.86 tons**, more than Mixed Paper.
- Wide date range (2017–2026), indicating legacy data included.
- Noticeable improvement in 2025–2026 output compared to older years.

Aluminum

- Lightest category at **83.77 tons**.
 - Very consistent bale weights (~20–23 tons per shipment).
 - Only 4 shipments shown — so the process is likely small-scale but stable.
-

3. Shipment Frequency Insight

Based on your tables:

- OCC has **over 25 shipments** in 2026 alone.
- Mixed Paper has **8 shipments** in 2026.
- Plastic data shows **9 recent shipments** (with older historical ones included).
- Aluminum shows **4 shipments**.

OCC and Plastic production increased significantly in 2026.

Mixed Paper and Aluminum remained smaller but steady

4. Fastest-growing materials:

1. **OCC 11** (major jump from 2025 to 2026)
2. **Plastic** (modern shipments heavier and more frequent)
3. **Mixed Paper** (moderate but stable growth)

Slowest:

- **Aluminum** (likely constrained by supply or processing capacity)
